

Our quality and environmental management

Our goal: High quality standards of our products and a sense of responsibility towards our environment and society.

Our market and customer orientation

Satisfied customers are the basis of our success. In order to meet their requirements, we continuously optimize our processes – also with regard to a resource-saving and proportionate use of all energy sources.

Our employees

Every single employee contributes to the success of Leuze and the protection of our environment. The promotion of personal skills, continuous training and learning are key issues here. Mutual appreciation, team spirit and togetherness as well as reliability and trust determine our actions.

Our processes and technologies

Our goal is to avoid errors instead of correcting them through a constant analysis and improvement of our processes. We take responsibility for the sustainable protection of our environment through the use of future-oriented technologies, and we use primary and secondary materials in a resource-conserving manner.
