25 SERIES
Photoelectric sensors and diffuse sensors
THE NEW SENSOR GENERATION SETS STANDARDS

The new 25 series offers a high level of functionality and flexibility for a wide range of industry sectors.

COMPACT, RELIABLE FUNCTION-OPTIMIZED

With their degrees of protection IP 67 and IP 69K, the ECOLAB certification as well as the active ambient light suppression, the extremely compact sensors of the 25 series offer a very high level of flexibility and reliability for various areas of industry.

Numerous additional functions, such as the activation input and the warning output, enable the maximum of cost-efficient process reliability and system availability for your applications.
ONE SERIES – ALL OPERATING PRINCIPLES

From the throughbeam photoelectric sensor to the sensor with background suppression, the 25 series offers an extensive sensor product line that has been optimized for a wide range of applications, especially in intralogistics and packaging technology.

**power reserve.**
- Not sensitive to soiling thanks to very high function reserve
- High immunity against external light interference through A²LS
- High environmental resistance: IP 67, IP 69K
- Chemical resistance tested in accordance with ECOLAB
- Large operating temperature range:
  \(-40 \degree C – +60 \degree C\)
- Increased availability through warning output and activation input

**easy handling.**
- Time-saving commissioning with brightvision\textsuperscript{®}:
  Fast and simple alignment through very bright light spot
- Bright indicator diodes with all-round visibility enable complete monitoring
- Additional status display on the front side of the sensor
- Compact, robust housing with metal sleeves and M4-thread

**think modular.**
- Large operating ranges
- Adjustable sensitivity for high reliability
- Sensors with mechanical or electronic background suppression
- Reliable, exact object detection for positioning
- Diffuse sensors with special light spots

*brightvision\textsuperscript{®}*: Fast and simple alignment through very bright light spot

Bright indicator diodes with all-round visibility
## RETRO-REFLECTIVE PHOTOELECTRIC SENSORS

### PRK 25C

</tr>
</tbody>
</table>

- Standard retro-reflective photoelectric sensors offer high system availability under extreme environmental conditions
- Additional functions, e.g. warning, activation, for increasing the process reliability
- Powerful laser retro-reflective photoelectric sensor for small parts or gap monitoring
- Optimum beam path for counting and positioning applications
- In laser class 1 and 2

<td></td>
</tr>
</tbody>
</table>

- Universally usable diffuse sensor
- Reliable detection of objects with glossy and inconsistently structured surfaces
- Mechanical adjustment of scanning range, background suppression
- Reliable switching even in dusty environments

Wood plate detection

</table>

- In laser class 1 and 2
- Mechanical adjustment of scanning range, background suppression
- Very good black/white behavior

Compartment fine positioning in high racks
HRT 25B.XL

- Light source: Red light LED
- Operating range limit: 600 mm
- Adjustment range: 600 mm
- Switching frequency: 250 Hz
- Response time: < 2 ms

- High switching frequency and short response time for detection of fast events
- Long light spot for structured surfaces
- Reliable detection of objects with openings such as meshed containers

Positioning in container warehouse

HRT 25B-LR

- Light source: Infrared LED
- Operating range limit: 0.1 – 2.5 m
- Switching frequency: 30 – 50 Hz
- Response time: < 33 ms

- Especially small black/white error with high reproducibility
- TOF sensor for the detection of objects > 50 x 50 mm with 2 switching points
- 2 teachable switching points with indicator LEDs in optical window

Compartment occupation check
THROUGHBEAM PHOTOELECTRIC SENSORS

Protective sensor in category 2
SLSR 25B

</tbody>
</table>

- Contactless protective device in accordance with category 2 in combination with testing in accordance with EN 61496-1 and MSI-T safety relay
- Time-saving alignment through optimized light beam propagation (opening angle)
- High-intensity throughbeam photoelectric sensor (adjustable on both sides, LSR.2) for large operating range and demanding environments
- Also suitable for radiation through films

Foot-space safeguarding

Content check with radiation through films
OUR PROMISE TO YOU

SMARTER PRODUCT USABILITY
With regard to our product developments, we systematically place emphasis on the especially good usability of all devices. To this end, simple mounting and alignment are taken into account – just as the uncomplicated integrability of the sensors in existing field bus systems and easy configuration, e.g. via a web browser, are.

SMARTER APPLICATION KNOW-HOW
Whoever can do it all, can do nothing right. Which is why we concentrate on selected target sectors and applications. There, we are specialists and know all aspects inside out. For this purpose, we optimize our solutions and offer a comprehensive product range that makes it possible for our customers to obtain the absolute best solutions from a single source.

SMARTER CUSTOMER SERVICE
The technical and personal proximity to our customers, and a skilled, straightforward handling of queries and problems, are among our strengths – and will remain so. Consequently, we will continue to expand our service offerings and, indeed, also forge ahead in new directions to persistently redefine the utmost in customer service. Whether on the phone, on the Internet or on-site with our customers – regardless of when and where the expertise of the sensor people is needed at any time.
